## Corridor Public Workshops – January 13 and 15, 2015

The Florida Department of Transportation (FDOT) is conducting a Project Development and Environment (PD&E) Study to evaluate corridors for a limited access expressway from Pleasant Hill Road to Florida's Turnpike in Osceola County (see project location map below). The study will identify and evaluate transportation alternatives for providing connectivity and reducing congestion in the Poinciana community, consistent with the purpose and need for the project.

There are two corridor public workshops scheduled for this project. The purpose of these workshops is to present project updates to the general public and request comments on the project corridors currently being evaluated. Each workshop will be an informal open house beginning at 5:30 p.m. An informational video presentation will run continuously throughout the open house. The information provided to the public will be the same at both workshop locations. The workshops will end at 7:30 p.m. FDOT welcomes and appreciates everyone's participation in the project.
